

Dmitry Kutin

Full-Stack Developer

Driven Full Stack Developer with 3 years of professional experience in designing, developing & maintaining responsive web applications using MERN & LAMP stacks across multiple web services, third-party integrations, and databases.

Work History

2022 – Current

Ottawa, ON

Permanent Full-Time

Web Developer (Full-Stack) | Fortinet

- Enhanced resource traceability for a lab platform that enables students to configure Fortinet products in pre-provisioned VMs.
- Overhauled integration responsible for collecting in-person exam results to use modern design patterns, resulting in improved page load times and a reduced number of database transactions.

2020 – 2021

Ottawa, ON

Contract Full-Time

Web Developer (Full-Stack) | University of Ottawa

- Coordinated development for a Self-Serve MFA Reset application, designed for re-use in other higher education institutions using Microsoft Azure AD, deployed using Helm charts.
- Transformed 300+ Drupal 7 sites to Drupal 9 working in a cross-functional team of 40 employing scrum principles.
- Managed feature development, maintenance & deployment of web applications responsible for serving over 50 000 students, faculty, and staff as a main point of access for the University's online services.

2019 – 2020

Ottawa, ON

Internship

Junior Web Developer | University of Ottawa

- Implemented web service configuration management and an API response caching mechanism for a module designed to calculate student tuition fees based on an extensive criterion.

Education

2017 – 2022

University of

Ottawa

Honours BSc, Computer Science, Management & Entrepreneurship

- Facilitated development of a cross-platform, React Native mobile application to notify users of pre-operative guidelines intended for CHEO and Stollery Children's Hospitals.
- Architected a three-tier MERN web application designed to aid in scheduling events for recognized student bodies.
