Dmitry Kutin

Full Stack Developer

Driven Full Stack Developer with 3 years of professional experience in designing, developing & maintaining responsive web applications using MERN & LAMP stacks across multiple web services, third-party integrations & databases. An efficient problem-solver through analytical thinking, the ability to provide innovative solutions, and anticipate potential problems.

Work History

2020-09 - Current

Web Developer

University of Ottawa, Ottawa, ON

- Refactored a legacy codebase of a mass notification system, improving the reliability from 20% to 99.9%, and reducing response time by 80%.
- Contributed to the migration of 300+ websites from Drupal 7 to Drupal 8, working with a multi-functional team of 40 employing scrum principles.
- Developed various modular front-end web components using Javascript (ES6), Twig, SASS and PHP (5.6, 7), and back-end Drupal modules connecting to REST services.
- Managed feature development, maintenance & deployment of a web application responsible for serving over 50 000 students, faculty and staff as a main point of access for the University's online services.

2019-05 - 2020-09

Junior Web Developer

University of Ottawa, Ottawa, ON

- Organized & led monthly training sessions for faculty & staff on using Drupal as a Content Management System.
- Implemented web service configuration management & an API response caching mechanism for a custom module designed to calculate student tuition fees based on extensive criteria.
- Analyzed client requirements to develop a collection of 12 webpages backed by a custom theme (HTML, CSS, JS) to front the University's Digital Transformation project.

Education

2017-09 - Current

Bachelor of Science: Computer Science, Management & Entrepreneurship

University of Ottawa - Ottawa

- Received the Merit Scholarship in the last 4 semesters with an average CGPA of 9.00.
- Architected & developed a three-tier MERN web application designed to aid in scheduling events for recognized student bodies, with support from the University's Dean of Engineering, Registrar office & IT solutions.
